Sheth L.U.J College of Arts & Sir M.V. College of Science and Commerce
Department of Information Technology (B.Sc.I.T Semester V)
Artificial Intelligence
Module-2 Practical No. X

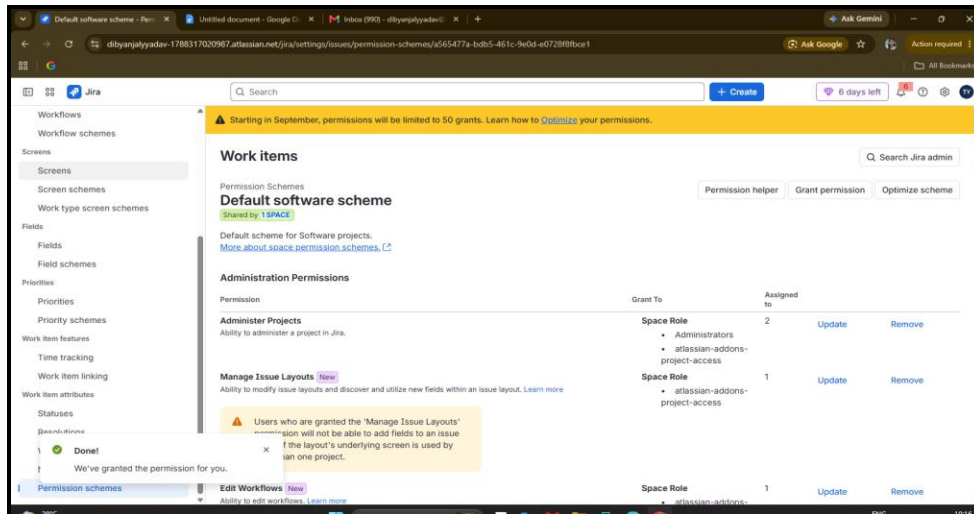

Roll No.: 52	Name: Divyanjali Yadav
Class: TYIT	Batch:
Date of Assignment: 26/09/2026	Date/Time of Submission: 26/09/2026

Permission & Security Management

A. View and modify Project Permission Scheme.

1. Log in to Jira and open the required project.
2. Go to Project Settings → Permissions and view the current permission scheme.
3. Click the required permission or scheme option and modify the users, groups, or roles as needed.
4. Save the changes and verify that the updated permissions are applied to the project.

B. Configure Project Roles and assign permissions.

1. Open **Jira Settings** → **System** → **Project Roles** and view the available project roles.
2. Create a new role or select an existing role according to the requirement.
3. Open the project and go to **Project Settings** → **People**, then assign users to the required roles.
4. Check the permission scheme and confirm that the assigned role has the required project permissions.
