### Practical 12: Introduction to Jira Mobile App

#### A. Install and configure the Jira Mobile App.

##### Steps:-

- 1.Open the **Google Play Store** on an Android mobile or **App Store** on an iPhone.
- 2.Search for the **Jira Cloud by Atlassian** mobile application and tap **Install/Get**.
- 3.After installation, open the Jira app and select **Log in**.
- 4.Enter your Atlassian account credentials and sign in to your Jira account.
- 5.Select the required Jira site/project and allow the necessary notification permissions.
- 6.Check that the project and issues are displayed correctly on the mobile application.

##### Output:-

#### B. View and update issues from mobile (Status, Comment, Assign).

##### Receive notifications and manage real-time updates

##### Steps:-

- 1.Open the Jira mobile application and select the required **project**.
- 2.Open an existing issue to view its details, description, assignee, status, and comments.
- 3.To update the issue, select the **Status** option and choose the required status, such as *To Do*, *In Progress*, or *Done*.
- 4.Add a comment by selecting the **Comment** option, enter the required message, and submit it.
- 5.To assign the issue, select **Assign**, choose the required user, and confirm the assignment.
- 6.Enable **notifications** to receive real-time updates about changes, comments, assignments, and issue activity.
- 7.Verify that all changes are saved and reflected immediately in the Jira mobile application.

## Output:-
