Artificial Intelligence

Module-2

Practical No. V

Roll No.: 52	Name: Divyanjali Yadav
Class: TYIT	Batch:
Date of Assignment: 09/09/2026	Date/Time of Submission: 09/09/2026

5(A)

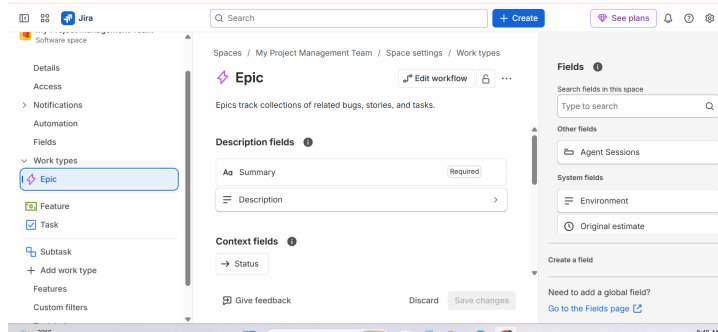

Open Space Settings

Click on the **More options** (...) beside the project/space name and select **Space settings**. In **Space settings**, select **Work types** from the left-side menu.

Select Epic

From the list of work types, select **Epic**.

The Epic work type page displays the existing fields and workflow settings.

Edit Workflow

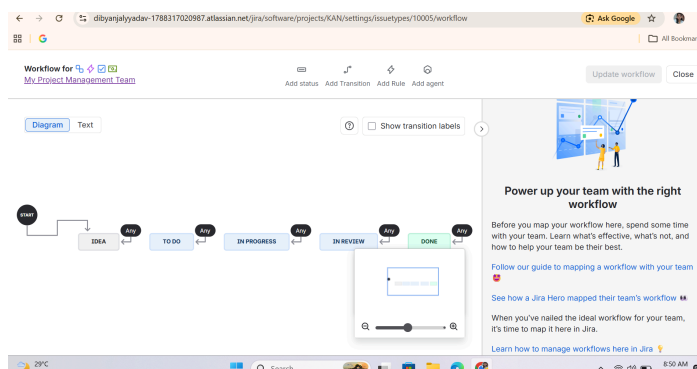

Click on the **Edit workflow** button.

The workflow editor is opened in the Diagram view.

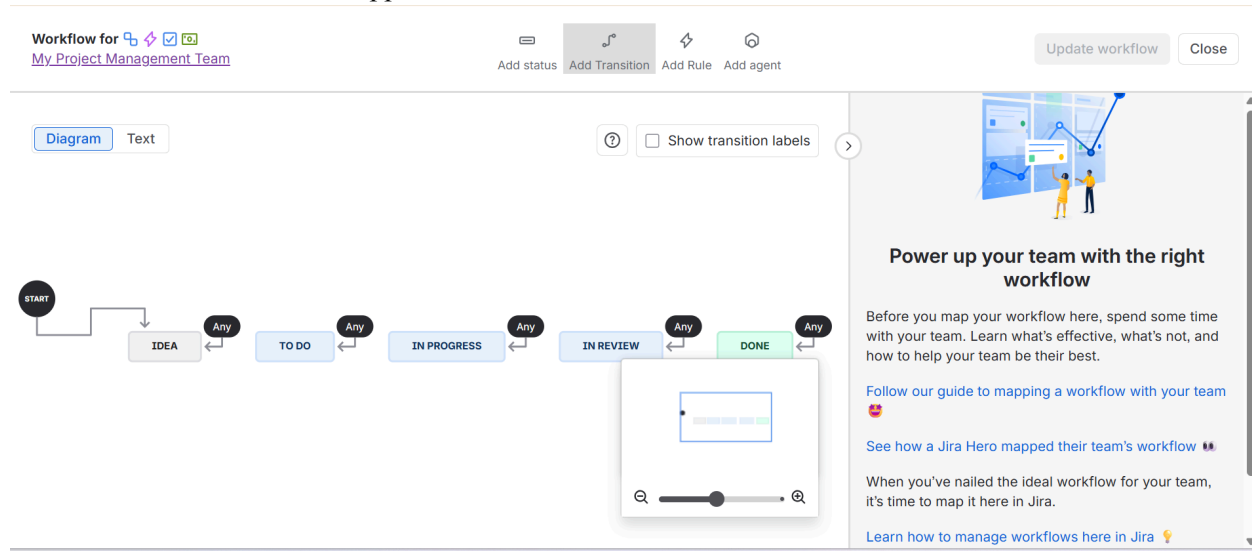

View the Existing Workflow

The workflow contains different statuses such as:

- **Idea**
- **To Do**
- **In Progress**
- **In Review**
- **Done**

5(B)

Click Add TransitionIn the workflow editor, click **Add Transition**.A **Create transition** window appears.**Select From Status**

In From statuses, select:

Idea

Select To Status

In To status, select:

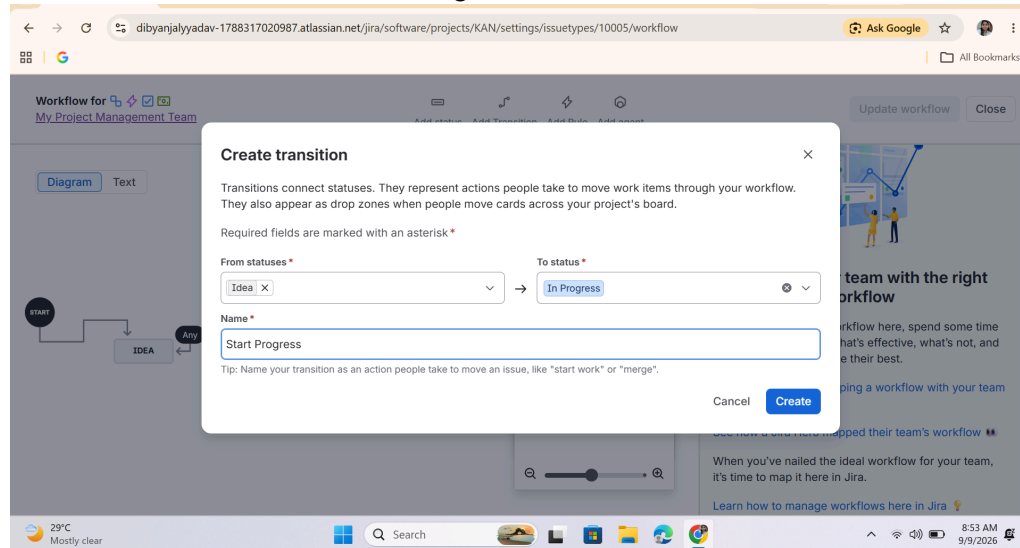

In Progress

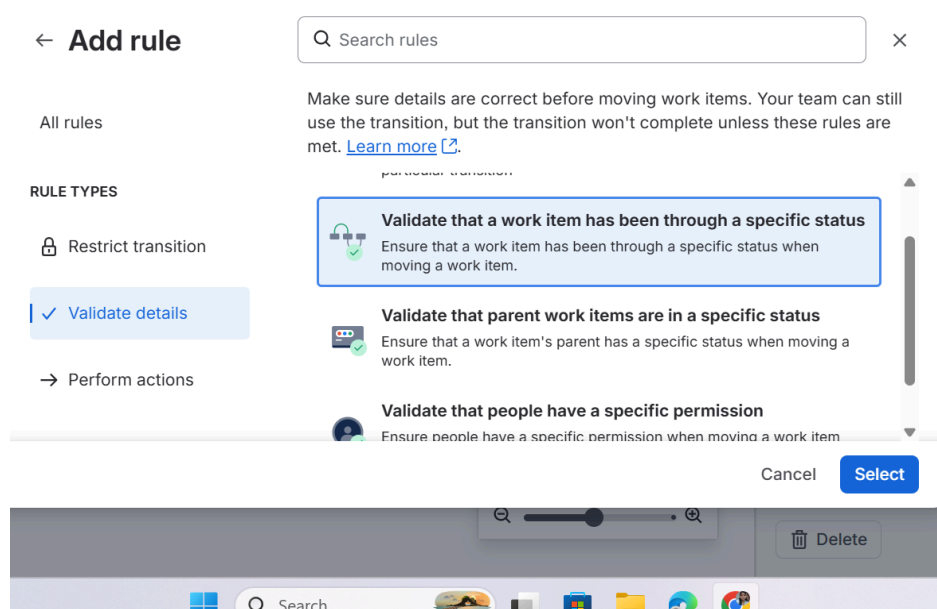

Enter Transition Name

In the Name field, enter:

Start Progress

The transition connects Idea → In Progress.

**Add Rule**Click **Add Rule**.The **Add rule** window appears.

Select Validate Details

Under **Rule Types**, select:

Validate details

This type of rule checks that the required conditions/details are satisfied before the transition is completed.

Select Validation Rule

Select: **Validate that a work item has been through a specific status**

This rule ensures that the work item has passed through a specified status before it can move through the transition.

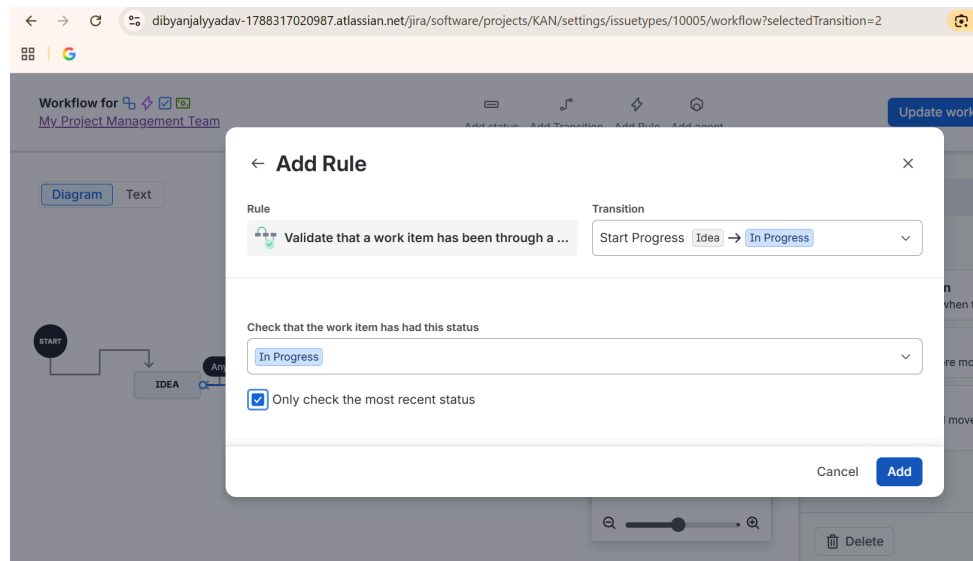

Configure the Rule

In the rule configuration window:

Transition: Start Progress

Check that the work item has had this status: In Progress

Add the Rule

The image shows a Jira workflow configuration interface. The top section displays a workflow diagram with statuses: START, IDEA, IN PROGRESS, IN REVIEW, and DONE. A modal window titled "Transition rules" is open, showing the "Validate details" tab. The rule is "Validate that a work item has been through a specific status" with the condition "Ensure the work item has just been in the 'In Progress' status". The "Perform actions" tab shows the action "Perform actions and move issue to 'Start Progress'".

Below the modal, the workflow diagram is shown in detail. The "Transition" panel on the right shows the "Start Progress" transition. The "Path" section shows the transition from "Idea" to "In Progress". The "Rules" section shows the rule "Validate that a work item has been through a specific status".

The bottom section shows the workflow diagram with the "Start Progress" transition highlighted. The "Transition" panel on the right shows the "Start Progress" transition. The "Path" section shows the transition from "Idea" to "In Progress". The "Rules" section shows the rule "Validate that a work item has been through a specific status".

5(C)

Verify Transition Rules

The **Transition rules** window displays the added validation rule under **Validate details**.

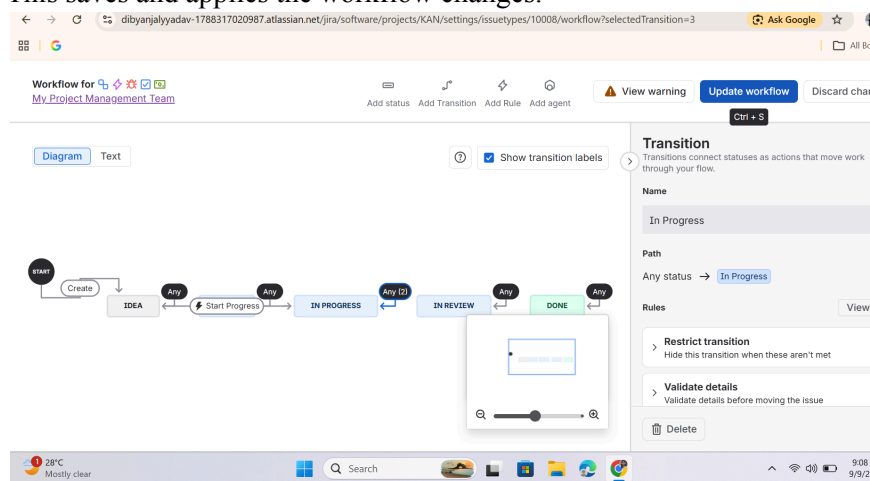

Verify that the rule is:

Validate that a work item has been through a specific status.

Update Workflow

Click the **Update workflow** button at the top-right of the workflow editor.

This saves and applies the workflow changes.

Verify the Updated Workflow

After updating, the workflow diagram displays the **Start Progress** transition and the configured rules.
